TransPedia Research Talk Series

ABOUT THE TALK SERIES

NATPAC has been conducting a series of technical talks 'TransTech Talk Series', since February 2023, where industry experts and eminent researchers come together to discuss the latest advancements, challenges, and innovations in the field of transportation.

TransPedia Research Talk Series is yet another unprecedented and distinctive endeavor from NATPAC, envisioned to promote research for shared benefits, by disseminating knowledge on diverse topics from cutting-edge technologies to sustainable solutions. Desirably, this also brings out a platform for young researchers across the globe to connect and interact to better shape the future of research and development in transportation.

ABOUT THE TALK # 9

"Investigating heterogeneity in alternatives, decision rules, contextual variables and choice set in commute mode choice"

The talk deals with differences in mode choice behavior due to heterogeneity in multiple components of decision-making – differences among IPT alternatives, heterogeneity in decision rule adopted by decision makers, heterogeneity in degree and source of captivity to personal vehicle, heterogeneity in the number of co-passengers during commute, heterogeneity in the treatment of the alternatives in the choice set etc.

ATTENDEES

Transportation Professionals, Engineers, Urban Planners, Researchers, Industry Experts, Policy Makers, Students and anyone enthusiastic about the future of transportation.

Follow us on:

NATPAC @NATPAC3

Natpac Trivandrum

Don't miss out on this opportunity to delve into the realm of transportation innovation. Join us for insightful conversations, connect with fellow industry professionals, and be part of shaping the future of transportation.

ABOUT THE SPEAKER

Dr. Parthan K.

Assistant Professor
Civil Engineering Department
B.M.S. College of Engineering
Bangalore

Dr. Parthan K. completed his Ph.D from Indian Institute of Technology Madras in 2022, under the guidance of Prof. Karthik K. Srinivasan. His research focused on capturing heterogeneity in fundamental elements of choice with specific focus on urban commute mode choice behaviour in Chennai city.
