### ABOUT THE TALK :

The talk navigates into the evolving landscape of maritime decarbonization, shedding light on the transition towards eco-friendly practices in the shipping industry. The presentation will address the distinctive characteristics of the maritime sector and subsequently delve into the strategies employed by ships to mitigate their environmental footprint. From the adoption of cleaner fuels to compliance with stringent regulations, the session unveils the dynamic developments propelling the industry towards sustainability. Insights into key initiatives, regulatory frameworks, and future trends shaping the maritime sector's sustainability journey will be provided. The path to a more environmentally conscious maritime sector will be explored, emphasizing the industry's commitment to greener practices and compliance with evolving standards.

### ABOUT THE SPEAKER :

Mohammad Nizar Poovanmadathil is a customer success manager at Shipshave in Stavanger (Norway). He is experienced in Naval Architect with a decade of experience in the maritime industry. Possesses a strong background in ship design and construction, as well as comprehensive knowledge of maritime regulations, project management, and client relationship management. He has earned Master of science degree in Marine Technology from the Norwegian University of Science and Technology, Netherlands and he is an associate member of the Royal Institute of Naval Architects. Presently he is serving as the Chair of the Green Shipping Committee at Young ship International.
